

Are renewable energies a problem in Peru?

According to statements by the president of the Sociedad Peruana de Energías Renovables (2021)¹¹: "There is a lot of opposition, unfortunately, to renewable energies taking a predominant or, at least, significant role in the Peruvian electricity sector.

What is the current state of RER generation in Peru?

Despite the progress made in the first years after the publication of DL 1002, the development of new RER projects has decreased. Section 9 has presented a summary of the current state of the RER generation policy and the recommendations to conduct the energy transition in electricity generation in Peru.

How much energy does Peru use?

More than two thirds of Peru's total energy supply comes from fossil fuels , with oil accounting for approximately 43% in 2019, followed by gas (26% to 31%, according to various recent reports) and coal (2%). Peru's electric fuel mix. Source: Ojo Público

Is the RER A reliable source of power in Peru?

Peruvian regulations establish that, as it is an intermittent resource, in many cases these generators have a null degree of control over their generation capacity, so they should not receive a payment for power and therefore it is stated that the RER they are unreliable¹⁰.

Should Peru raise its energy goal with RER?

In successive statements by the Ministers of Energy and Mines, it was constantly said that Peru should raise its goal of electricity generation with RER, from 5 to 15% by 2030. Let us remember that the goal of 5% was established in DL 1002 of 2008, where it was also said that new goals would be established for future years. But this did not happen.

What is Peru's energy policy?

Peru's national energy policy (Propuesta de Política Energética de Estado Perú; 2010-2040) aims to diversify the country's energy mix and emphasize renewable energy and energy efficiency in order to meet the country's long-term needs.
