

How will a wind power plant benefit the Philippines?

The generated electricity will be supplied to distribution utilities and retail operators in the Luzon and Visayas regions. When this wind power plant is completed, it will be one of the largest onshore wind farms in Southeast Asia and will contribute to the Philippine government's green technology and zero-carbon initiatives.

What is the Philippines platform?

The Coalition for Emerging Market Infrastructure Investment, which includes private equity giant KKR and Co. and infrastructure leader Global Infrastructure Partners (GIP), has launched the Philippines Platform, which is dedicated to catalyzing at least \$300 billion in infrastructure investment into the country.

How much money does the Philippines need to invest in infrastructure?

In the launch meeting, the parties agreed to establish an ambitious road map to enable support for investment needs into infrastructure across the Philippines, which is estimated to need at least \$300 billion to fill the infrastructure funding gap.
