

# Photovoltaic hydrogen energy storage stocks

Are green hydrogen stocks a good investment?

Due to industry headwinds, green hydrogen stocks have declined in value quite a bit, with both exchange-traded funds (ETFs) listed in this article down about 40% this year through Nov. 14. That means that patient investors may be able to find bargains among strong green hydrogen companies that show promise.

Should you invest in hydrogen energy stocks?

A look at some of the leading hydrogen energy stocks that investors should keep an eye on in the coming year. Hydrogen, while not easily found in an extractable form, is a cleaner source of energy than fossil fuels. Several companies are working hard to tap into the enormous promise of this potentially emission-free fuel.

Is Bloom a green hydrogen stock?

Among green hydrogen stocks, Bloom is one of the blue chips. The company makes both fuel cells and electrolyzers, so it's involved in the twin pillars of the green hydrogen space. Bloom's fuel cell systems can run on hydrogen, biogas and natural gas, giving the company a larger market until green hydrogen becomes more widely adopted.

Is plug a good hydrogen stock to buy?

Unfortunately, it wasn't enough to produce a profit, with net losses growing from \$156.5 million to \$206.6 million. Still, even with disappointing financials, Plug deserves its place on your hydrogen stock buy list for the long term.

Are green hydrogen ETFs a good investment?

There aren't that many publicly traded pure-play green hydrogen companies, and the ones that exist are relatively new, which makes the diversification offered by green hydrogen ETFs attractive.

Should you invest in a green hydrogen project?

These investments offer ways to get in early on the green hydrogen boom. Despite recent declines, interest rates remain significantly higher than the past 15 years, making green hydrogen projects more expensive to finance.
