

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Will Honda build an EV battery plant near Alliston?

The company has a basic agreement with Honda Motor Co. Ltd., which announced this year it is building an EV battery plant next to its Alliston, Ont. assembly plant. The number of people to be employed at the completed Port Colborne plant was not revealed in May, and details about direct jobs will be announced later.
