

Lede chose to collaborate with Pixii, installing a single PowerShaper cabinet. Pixii's sophisticated BESS, equipped with smart inverter technology, not only manages overvoltage; it introduces a streamlined approach to grid management, minimizing the physical and financial disruptions associated with traditional methods.

### The Benefits

At the core of all Battery Energy Storage Systems (BESS) from Pixii you find our bi-directional power conversion unit called the PixiiBox. Bi-directionality means that the energy flow can go both ways, from grid to the battery and back to the grid. It connects to a range of energy sources, like solar panels, the grid, generators, and more. ...

The new Brisbane office is an addition to Pixii's existing presence in Sydney and reflects our commitment to extending the reach across Australia. The strategic decision to expand in Brisbane was motivated by Pixii's increasing growth in the country and the unique suitability of its distributed BESS solutions for the Australian energy ...

When you invest in a Pixii BESS, a comprehensive SLA is the key to maximizing your return and ensuring long-term operational excellence. Consider your SLA not as an added cost, but as an investment that pays dividends in reliability, system longevity, and overall peace of mind. Choose a comprehensive SLA and protect your energy future.

The United States is undergoing a profound transformation in its energy landscape, with increasing demand for distributed BESS to support electrification and decentralized power systems. Pixii's European-quality products, combined with cutting-edge modularity, resilience, and security, are the perfect solutions for this transition.

The deployment of the first Pixii BESS at one of Milence's site has marked the beginning of an ambitious plan to establish a European network of E-truck charging stations. The Venlo project has shown that enhancing power capacity with scalable energy storage solutions can meet the demanding needs of the electric logistics industry. Milence is ...

Pixii Academy is our online support portal designed to help partners and installers educate themselves on the latest in Pixii's modular BESS technologies and best practices. Whether you are new to the field or an experienced professional ...

The Pixii PowerShaper XD, is a fully integrated IP55 modular energy storage system designed for easy deployment, high energy density, low noise stand alone or grid connected power. ... This is a state-of-the-art solution meticulously designed for seamless integration with Pixii PowerShaper XD BESS Battery acts as the

This advanced cabinet ...

A bi-directional BESS with smart functions. Pixii's battery energy storage system offers a range of advanced functions, including voltage support, phase balancing, and active and reactive power compensation. The BESS is modular and easy ...

One of the biggest benefits of implementing a Pixii Bess with bi-directional converters is the potential to generate additional revenue through the trade of excess energy. This can not only offset the initial investment in these technologies, but also provide a ongoing source of income for telecom operators.

The Pixii BESS enables fast charging even in areas with weak grid infrastructure, while optimizing energy use and generating revenue. Pixii's modular and scalable BESS is designed to grow with your business, keeping investment costs low. With smart functionality like time shifting and peak shaving, you can store energy during off-peak hours ...

The Pixii Battery Energy Storage System is designed to be easy to install, quick to deploy, and requires minimal maintenance. With its innovative power architecture, all-in-one cabinets, and intuitive web app, the Pixii BESS is the perfect solution for anyone looking for a reliable and efficient energy storage system.

Pixii has signed a memorandum of understanding with SCSK and Kawamura Electric to launch a distributed integrated energy management system. This represents Pixii's entry into the Japanese market. Conventional BESS systems have consisted of a combination of existing equipment and custom-made equipment tailored to requirements.

Optimize energy use and generate revenue with a modular, scalable BESS. With energy demand on the rise, businesses need a flexible solution that scales to meet their needs without upgrading old grid infrastructure. The Pixii PowerShaper is a modular battery energy storage system that optimizes energy use, helping you avoid costly grid upgrades.

The BESS that pays for itself! As businesses transition to electrified operations to meet sustainability goals, Pixii's modular BESS helps lower capital expenditure by scaling to your specific needs. Seamlessly integrate with solar PV systems to optimize energy use and minimize operational costs. Maximizing ROI with dynamic value stacking

The PowerShaper PoleTop from Pixii, is an IP55 complete modular energy storage system. ... The PowerShaper PoleTop BESS solution is available as either a single or double cabinet solution, with each cabinet delivering up to 30kW of power conversion and 72kWhr of energy with Polarium's latest Gen 6 9.1kWhr NMC batteries providing high energy ...
