Our GenTrader™ platform is the most all-encompassing energy generation and storage portfolio modeling and optimization software available to ISO and bilateral market participants. ...

Result from the survey shows that the integration of demand side management, energy storage systems (ESSs), and short-term operational characteristics of power plants in GEP models ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil fuel-based power generation with power ...

The pressure of climate change has been driving the transition of power distribution networks (PDNs) to low-carbon energy systems. Hydrogen-based microgrids (HMGs), as emerging ...
