

Can energy storage projects be sited in Poland?

For energy storage projects, there are two potential options for site acquisition in Poland. Firstly, the potential investor may acquire ownership of the property on which the planned project will be sited.

What agreements do you need for energy storage projects?

Unquestionably though, each energy storage project will require several agreements during the execution stage, e.g. joint venture agreements and relevant corporate structures (SPVs), EPC contracts, project management agreements, lease agreements, loan agreements and insurance policies.

How many energy storage projects are there in Australia?

Australia is one of the world's leading markets for energy storage deployments with more than 3.5 GW energy storage projects in the first quarter, of which BESS projects exceeded 2.1 GW, accounting for nearly 60% of the total. These BESS projects are mainly scheduled to commence operation during 2025 and 2026.

Why is Poland working on new Res regulations?

The Polish legislator has been working on new regulations that will facilitate the implementation of RES projects necessary to achieve the goals of the Fit for 55 package. As in many other EU jurisdictions, in Poland the exponentially growing number of RES investments is causing disruption to the power grid.

What are the proposed energy storage amendments?

The Draft is currently in the final stage of inter-ministerial arrangements and public consultations. The main purpose of the proposed amendments is to strengthen the role of energy storage in system balancing and the mobilisation of entities other than electricity system operators to invest in energy storage facilities.
