

What does a port energy company need to do?

High on the agenda for the energy company is to secure capacity for delivering the electricity needed for a port's operations and its visitors as well as the placement and ownership of energy storage. The information interface between the different subsystems needs to be defined and the business models must be worked out.

Is it time for energy hub port projects?

It is time to prepare and form relevant energy hub port projects under the European Union Green Deal initiative. The port as an energy hub is one of three legs of research into the sustainable port being pursued by RISE, together with the port as a transshipment hub and the port as information hub. About the authors

How can ports reduce dependency on Conventional Energy Resources?

Renewable energy resources have become the main priority of countries to reduce dependency on conventional energy resources. Ports, as an energy-consuming sector, are seeking alternative sources of energy. Various approaches have been proposed to develop an alternative energy source in ports.

Can ports use solar energy as an alternative energy source?

Ports, as an energy-consuming sector, are seeking alternative sources of energy. Various approaches have been proposed to develop an alternative energy source in ports. Some ports, such as Antwerp and Genoa, decided to use solar energy as an alternative energy source for their some loads.

Are ret applications in Green ports a sustainable future?

Many ports around the world have already started to adopt RETs, and the trend is expected to continue in the future. This paper summarizes the potentials, challenges, and economic analysis of RET applications in green ports for a more sustainable future.

What is the potential of hydrogen import through the North Sea port?

Importing is essential and the North Sea port is also suitable. The potential of hydrogen import through the North Sea port is estimated to be about 6 million tons annually by 2050. Hydrogen is imported in different ways, one of which is in the form of ammonia. Unlike hydrogen, ammonia can be stored in liquid form in tanks.

Bunker One has leased physical tank storage facilities on land in Port Louis, equal to a storage capacity of 20,000 m³ bunker product, on a long-term basis and intends to establish offices and bank connections locally.
