

What can a portable power station Power?

Portable power stations can power anything from your phone or laptop to your refrigerator or portable air conditioner--just make sure to select one with a high enough amperage output and battery capacity.

Who makes the best portable power station?

Bluetti is another one of those portable power station companies that make a power station for just about every scenario and every size. However, while they make very good power stations for nearly every person and need, the one thing they do best is emergency power.

What are the best portable power stations for drones?

Editor's Note: We updated our Portable Power Stations guide on September 11, 2024, to add the Bluetti AC180T -- a unique station with hot-swappable batteries -- as well as the DJI Power 1000 -- a station primed for keeping your drones topped off.

What is portable power station output?

Portable power station output is measured in watts, and there are two numbers to look at: Continuous output is the wattage the power station can deliver on an ongoing basis, while peak output is the highest safe wattage it can output for a short time.

How much power does a portable power station hold?

On the small end, portable power stations hold around 300 Wh (like the little Goal Zero Yeti 300, our Best Budget pick). These little ones are generally smaller than a lunch box and good for tasks like recharging laptops and speakers, LED lighting, and small fans.
