

What is biofermtm technology?

Committed to sustainable and economical organic waste diversion, the BIOFerm™ technology utilizes anaerobic digestion to harness biogas rising from fermenting organics--food waste, manure, biosolids, etc.--converting it into valuable green energy, heat, fuel, and more.

Can natural gas be used in BIOFerm?

Natural gas can only be used to best effect once it is freed of hydrogen sulfide, volatile organic compounds, and siloxanes. This is done by passing it through large adsorbers filled with BIOFerm's activated carbon.

What sets BIOFerm apart?

BIOFerm strives to be the industry leading one-stop shop for turnkey facilities that generate value for waste producers and communities throughout North America*. **Collaboration is essential for success, both internally and with our customers. Honesty is a core value, and we conduct business in an open and transparent manner.

BIOFerm installed North America's first industrial-scale high solids anaerobic digester for the University of Wisconsin-Oshkosh in 2011. This dry fermentation system, dubbed Biodigester I or "BDI," serves as a living, learning laboratory for students and faculty while furthering the University's goals of being a sustainable campus with net zero carbon emissions.

About BIOFerm Energy Systems Based in Madison, Wisconsin, BIOFerm Energy Systems is an experienced provider of turnkey renewable energy systems, including anaerobic digestion, gas upgrading, and solar energy. From project conception to commissioning, optimization and training, BIOFerm handles every aspect of the entire process.

The average BIOFerm Energy Systems hourly pay ranges from approximately \$24 per hour (estimate) for an Administrative Assistant to \$52 per hour (estimate) for a Controls Engineer. BIOFerm Energy Systems employees rate the overall compensation and benefits package 2.8/5 stars.

Nadeem Afghan, CEO of BioFerm Energy Systems, is leading an effort to create environmentally friendly systems that convert organic waste into clean energy using the firm's anaerobic digesters. "It could be produced with cow waste, it could be produced with industrial waste," Afghan said, noting BioFerm's processes produce methane, which ...

BIOFerm also offers internships in a variety of departments. If you are passionate about a career in renewable energy, click the button below to explore our current openings. If there is not currently an opening that fits your experience and/or expertise, send your resume to . We're always looking for great people!

Lynchburg, TN - June 6, 2023 - 3 Rivers Energy Partners, a trailblazer in the renewable energy sector, has officially announced BIOFerm, a leading provider of anaerobic digestion and gas upgrading technology, as the EPC partner for a new, ground-breaking renewable natural gas (RNG) facility near the Jack Daniel Distillery in Lynchburg, Tennessee.

Average BIOFerm Energy Systems hourly pay ranges from approximately \$11.84 per hour for Marketing Intern to \$21.67 per hour for Administrative Assistant. The average BIOFerm Energy Systems salary ranges from approximately \$61,286 per year for Senior Accountant to \$90,000 per year for Process Engineer.

Waste-to-energy company Bioferm Energy Systems, Madison, Wis., also is a partner in the project. The Rosendale biodigester will process about 240 tons per day of separated solids - 23 percent ...
