

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Why should the Gambia invest in a solar plant?

Further to this, as a clean energy source and a major vehicle for climate change mitigation, the solar plant will contribute to the realisation of The Gambia's Nationally Determined Contributions". Mr. Nani Juwara, Managing Director at National Water and Electricity Company (NAWEC) "The significance of this solar plant cannot be overemphasized.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

How does a large scale solar PV project benefit the Gambia?

The project contributes to gainful employment creation in The Gambia with 1,250 direct jobs created from the construction phase to operation and maintenance. To ensure sustainability, a three-year operations and maintenance contract (O&M) has been signed as large scale solar PV is entirely new to the sector.

How can energy infrastructure be improved in the Gambia?

Improving energy infrastructure is consistent with the EU "Agenda for Change" policy, which identifies energy as an essential driver of economic growth. The project will contribute to reducing the existing electricity supply gap in The Gambia using sustainable solar energy resources.

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant and an eight Megawatt Battery Energy ...

Grid-scale battery storage in particular needs to grow significantly. In the Net Zero Scenario, installed

grid-scale battery storage capacity expands 35-fold between 2022 and 2030 to nearly 970 GW. Around 170 GW of capacity is added in ...

1 ?&#0183; Whether it's a cabin in the mountains, a remote village in a developing country, or a research station on the edge of civilization, the need for sustainable, independent power ...

4 ???&#0183; The Jambur solar plant will increase the generation capacity through an on-grid utility-scale solar photovoltaic (PV) plant with a total installed capacity of up to 20 MW (large-scale ...

This project component consists in the construction of a new 23 MWp solar park tied with 8MWh battery storage and aims to revolutionize power generation in the Gambia by serving as a direct complement to current ...
