

Do you need a power plug in Grenada?

In Grenada, power plugs and sockets (outlets) of type G are used. The standard voltage is 230 V at a frequency of 50 Hz. Yes, you need a power plug travel adapter for sockets type G in Grenada. You also need a voltage converter. Be extra careful with certain devices because of the difference in frequency. Do your power plugs fit in Grenada?

What is the supply voltage in Grenada?

In Grenada the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

What type of power socket is used in Grenada?

The power sockets in Grenada are of type G. The standard voltage is 230 V at a frequency of 50 Hz. You need a power plug (travel) adapter in Grenada.

Can I use a travel adaptor in Grenada?

This normally includes the use of a travel adaptor, which is a device that simply allows you to plug any UK electrical appliance into a foreign electrical socket. It is important to note that it does not convert the voltage or frequency. For Grenada the associated plug is type G, which has three rectangular pins in a triangular pattern.
