

Building on Portugal's high potential for wind and solar power, a European consortium of Madoqua Renewables, Power2X and Copenhagen Infrastructure Partners will develop a 500 MW electrolyser in the Sines Industrial and Logistics Zone (ZILS). Including facilities to produce up to 500 ktpa of green ammonia and a loading jetty, the project will ...

Japanese battery startup Power X unveils the design of a large electric ship to be completed by 2025. Vessel "X" will be the first in a line of "Battery Tankers" and is scheduled for field tests in 2026.

PowerX, a Software-as-a-Service company, provides the market-leading data intelligence platform for managing and optimising energy assets. The platform's advanced data science tools and workflows, integrated with enterprise business processes, deliver efficiency, resilience and sustainability for critical asset operations.

The International Hybrid Power Plants & Systems Workshop has been organized by Energynautics, Germany since 2018 is a partner event of the renowned Wind & Solar Integration Workshop, E-Mobility Power System Integration Symposium and Hydrogen Power System Integration Symposium organized annually by Energynautics as well.

Wind power produced in Åland covers about 65 per cent of the region's annual electricity consumption. When it is very windy, there is even a surplus of wind power, which can be sold to Sweden. Solar power and a small amount of bioelectricity are also available. In a pinch, Åland can start up two gas turbines fuelled by diesel oil.

PowerX Cube is an all-in-one storage battery system with a 358kWh storage capacity and a built-in PCS with an output of <80kW. A single unit can drastically improve the operational performance of industrial facilities and power plants.

Flexens, which was founded to capitalise on the unique expertise gained from the Smart Energy Åland (SMÅ) research programme, has developed significant capabilities in energy system modelling and project development since 2018. The company, which now has 19 people on its staff, aims to become a leader in renewable and green hydrogen and Power-to-X ...

Contact Email info@power-x.jp; Phone Number +81 3 4400 7296; PowerX brings power transfer technology to life, allowing for greater usage of renewable energy sources. ... Japan. *1 A state in which economic benefits can be obtained by installing storage batteries. According to estimates by the Ministry of Economy, Trade and Industry, the cost is less than 60,000 yen/kWh for business and industrial use and less than 70,000 yen/kWh for residential use. *2 By including a certain amount of cost in the initial investment, maintenance free for 20 years and ...

Powerland Group is a leading power conversion company, providing full service and solutions for electric vehicles, industrial, medical and other high-end power electronics applications, where efficiency, reliability, lifetime, and power density are the primary challenges. Under the leadership of power electronics scientists from one of the top ...

In 2020, after years of previous research on hydrogen possibilities in Å...land, Flexens started a project to materialise the first hydrogen and Power-to-X application: Power2AX. Power2AX aims to combine local ...

A decarbonized power supply for industrial processes can take the form of chemicals such as ammonia, ethylene or propylene. You can supply your industrial customers with these chemicals by combining hydrogen with CO₂, nitrogen or other compounds, triggering a chemical reaction which results in the desired product. As ever in PtX processes, the energy used to fuel these ...
