

Did a powin battery storage system catch fire?

What we have learned is that the fire alarms that went off occurred with two of Powin's newest model battery storage systems, which are referred to as the Centipede. One of those Powin Centipede systems, on County Road 1A in Warwick, NY caught fire as of early afternoon on June 27 th, 2023.

Is there a fire at a powin site?

There is currently an active fire at one of the sites. The local fire department, team members, and battery storage system manufacturer Powin have representatives on-site actively managing the situation and coordinating the response.

What happened at a battery energy storage system?

The governor's announcement came the day after fire erupted at a battery energy storage system in the Town of Lyme, in upstate Jefferson County on July 27. Hochul cited that fire and others at battery energy storage facilities in the Town of Warwick, in Orange County on June 26 and in the Town of East Hampton in Suffolk on May 31.

Where are convergent & powin batteries stored?

"The next couple of days will be used by Convergent and Powin to gather additional information." Powin is the manufacturer of the lithium-ion batteries stored by Convergent inside several storage containers housed on Warwick school grounds. The company rents the property from the school district, according to town officials.

Where are powin batteries located?

Powin batteries were featured in a proposal aired last year by Hexagon Energy to build a 100 MW BESS facility on a 3.6-acre site at 95 Mill Road in Riverhead, just north of the train tracks.

Is powin better than GE?

GE launched its product in 2018 backed by a hefty corporate balance sheet and a century of experience crafting power equipment. Powin is a much younger company than GE, but it has quickly grown into one of the most prolific suppliers of grid storage enclosures. The company vocally promoted better safety standards after the Arizona fire in 2019.
