

Purpose Lithium-ion (Li-ion) battery packs recovered from end-of-life electric vehicles (EV) present potential technological, economic and environmental opportunities for ...

The automotive industry is involved in a massive transformation from standard endothermic engines to electric propulsion. The core element of the Electric Vehicle (EV) is the ...

The Critical Materials Institute is a Department of Energy Innovation Hub led by DOE's Ames Laboratory and supported by the Office of Energy Efficiency and Renewable Energy's Advanced Manufacturing Office, ...

It is predicted that by 2025, approximately 1 million metric tons of spent battery waste will be accumulated. How to reasonably and effectively evaluate the residual energy of ...

The recently formed joint venture between Heritage Battery Recycling, Retrieval Technologies, and Battery Solutions is another North American example. 9 "Cirba Solutions unveil new combined entity of Heritage Battery ...

This would use battery packs from Volvo plug-in hybrids as stationary energy storage units, helping to supply so-called "fast-balancing" services to the power system. Volvo says these and other projects investigate ...

As batteries proliferate in electric vehicles and stationary energy storage, NREL is exploring ways to increase the lifetime value of battery materials through reuse and recycling. NREL research addresses challenges at the initial stages of ...
