

## Reinforcing Electrical Box to install 30 Gallon high protection level range

Hi, first time poster here and glad I found the site. I'm hoping to install a ceiling fan in my bedroom and have come across a perplexing situation with the outlet box. After removing ...

A personal choice for sure but when I have to flush mount a 30 -50 amp outlet I use a 4-11/16" deep box with an appropriate depth two gang plaster ring. I also make sure the ...

There are lots of ways to install a heavy light. Plan on an electrician charging for all day. Is there attic space above that you can get to? The basic idea is to get some wood ...

I scored this 90 gallon tank stand from a lps for half price after some minor shipping damage. Well looking closer it's only assembled with wood glue and staples. I know the stand ...
