

Does Reykjavik have a transportation sector?

The direct emissions associated with Reykjavik's transportation sector were calculated using Eq. 2, adapted from previous research (Bertoldi, 2018; Setiawan, Indarto, & Deendarlianto, 2019) stemming from the adapted Kaya Identity for transportation (Kaya, 1989).

Can fleet electrification decarbonize the transportation sector in Reykjavik?

Confirming results have been published by Asgeirsson, Stefansson, and Davidsdottir (2019) and Shafiei et al. (2019), where the results of these studies emphasized that a high level of fleet electrification is not enough to decarbonize the transportation sector within Reykjavik.

Does the EU Innovation Fund support a CarbFix & ON power project?

An article by the Ambassador of the European Union to Iceland, Lucie Samcovová - Hall Allen, about a recent grant from the EU Innovation Fund to the Icelandic companies Carbfix and ON Power. As the climate crisis becomes an increasingly pressing concern across the globe, new and innovative solutions are needed to combat its challenges.
