

Who owns Rimac energy?

The company is owned by a Bugatti-Rimac partnership. After finding success in the electric hypercar space, Rimac Technology is now launching the Rimac Energy division to create next-generation stationary Energy Storage Systems (ESS).

Is Rimac technology a good company?

Not bad. And the Croatian firm continues to grow, because Rimac Technology has now spawned another company called Rimac Energy, which it says will "leverage its expertise in making market defining electric vehicle technology to create the next generation of stationary Energy Storage Systems (ESS)"

Who owns Rimac electric cars?

Rimac, the Croatia electric hypercar maker is moving into energy storage technologies with a new division that will include megawatt scale charging solutions. The company is owned by a Bugatti-Rimac partnership.

What makes Rimac energy stand out?

"What makes Rimac Energy stand out, is the emphasis on fostering an open and supportive work environment, where everyone feels welcome and valued. I appreciate that we prioritize creating a clear sense of higher purpose, which helps everyone understand the bigger picture and work towards a common goal."

Where is Rimac based?

Headquartered in Sveta Nedelja, near Croatia's capital Zagreb, the Rimac Group manufactures hypercars and develops high-performance electrification, including batteries and power trains, and software solutions for some of the world's largest OEMs, including Mercedes, Jaguar, Renault, and Hyundai, among others.

Why should you work at RIMAC?

Everyone at Rimac has a passion for solving complex problems, pushing boundaries, and challenging the status quo. Individually you can make a real impact to our business; together we can change the way we power the planet for good.

After finding success in the electric hypercar space, Rimac Technology is now launching the Rimac Energy division to create next-generation stationary Energy Storage Systems (ESS). The performance electric vehicle brand's Energy ...

The energy storage subsidiary of Croatia-headquartered electric vehicle (EV) company Rimac has officially launched its modular battery energy storage system (BESS) product. Rimac Energy last week (17 October) ...

After finding success in the electric hypercar space, Rimac Technology is now launching the Rimac Energy

division to create next-generation stationary Energy Storage Systems (ESS). ...

Rimac Energy, the energy storage arm of electric vehicle (EV) technology company Rimac, has completed commissioning for its flagship SineStack, a grid-interfacing battery energy storage system (BESS).

Leveraging its group's expertise in EV technology, Rimac Energy has developed a novel battery architecture that is said to reduce efficiency losses by up to 50% while decreasing the system ...

Start your journey at Rimac Energy Join a team dedicated to pioneering the most advanced Battery Energy Storage System technology for a sustainable future. Through innovation, collaboration, and impactful progress, we are developing ...

To paraphrase the Bible and the Book of Genesis: "In the beginning, Mate Rimac created an electric E30 BMW 3 Series and Rimac Automobili." It was in 2009 that Rimac first setup his car company ...

The integrated power conversion system and liquid thermal management minimize energy losses, providing operational redundancy and optimizing battery use to extend lifetime. Smart Control: ...

Our grid-scale energy storage solution is designed to support decarbonisation while improving the grid flexibility and resilience. The modular system can be scaled from 0,2 MW into the GWs and enables a range of applications from ...

Rimac Technology, known for its groundbreaking electric vehicle technology, is launching Rimac Energy to further accelerate the transition towards a sustainable, powered planet. This new venture focuses on next-generation ...

Luxury electric car manufacturer Rimac Technology has announced the launch of Rimac Energy, a stationary energy storage technology. It's a first foray beyond EVs for the Croatian electric carmaker, reminiscent of ...
