

Are wind and solar energy plants growing in Russia?

Wind and solar energy plants in Russia increased their output from January-April 2022 by 61.9% compared to the same period in 2021.

Is solar energy on the verge of a major expansion in Russia?

Vadim Braidov /TASS Solar energy in Russia might be on the verge of a major expansion, thanks to a government support program for renewable energy sources, industry experts told The Moscow Times. Russia, the world's fourth-largest emitter of greenhouse gases, has historically relied on its vast oil and gas reserves to bolster its economy.

Does Russia have enough solar energy?

There is no sun there!' Well, our data tells us differently." Moscow-based renewables company Unigreen Energy, which has received a government guarantee that it will be paid extra for the power it adds to local grids, said Russia has more than enough insolation-- solar radiation hitting an object -- to produce solar energy.

How much energy is generated in Russia in 2022?

The total generation of RES (wind and solar energy plants) in the UES of Russia in April 2022 amounted to 766.2 million kWh, which is 66.6% more than in April 2021, for four months - 2,770.4 million kWh, which is 61.9% more than in the same period of 2021, the report said.

Will Russia's energy policy change?

The Omsk, Altai and Zabaikalsky regions, the republic of Sakha and other locations in Siberia and Russia's Far East launched their first solar plants in recent years, according to Tatiana Lanshina, the director of think tank Target Number Seven Association. However, she added that so far there are no signs of major changes in state energy policy.

Where is Kochubeyevskaya wind farm located?

The Kochubeyevskaya wind farm in southern Russia's Stavropol region. Erik Romanenko /TASS
