The WtE-powered desalination plant allows St. Barth to moderate its reliance upon regional and global networks and to achieve, at least in the sectors of waste-management and freshwater provision, a modicum of self-sufficiency.

How does Saint-Barth's benefit from regional cooperation?

In addition, Saint-Barth's benefits from regional cooperation through the 11 th EDF Caribbean regional programme (RESEMBID, EUR 42.67 million) on resilience, sustainable energy, and marine biodiversity and from the 2021-2027 Caribbean regional programme (EUR 21 million) on the sustainable management of Caribbean OCT's natural capital.

How does Saint-Barth's cooperate?

Cooperation with Saint-Barth's is channelled mainly through the territorial cooperation programme (which focused for the 2021-27 on disaster risk management).
