Are solar-powered home appliances a good idea?

However, with technological advances, more and more appliances are being designed to run on solar power, making it easier than ever to power your clean, renewable home. Today, more and more people are turning to sun-powered home appliances because of their many advantages, such as follows:

Does St Helena have double-glazing?

You can see the 2017 figures (right). St Helena households and businesses have also adopted a wide range of energy saving measures, driven perhaps by the very high cost of electricity on the island (in 2014 it was up to £0.42p per kWh, depending on consumption). Double-glazing is, however, uncommon on St Helena - it is rarely cold.

Are solar-powered cooking appliances a good idea?

Definitely YES! Solar-powered cooking appliances use the energy from the sun to power their heating elements. They convert it into electricity using a panel, then store it in the battery. The oven or stove will be turned on when the battery is charged. This way, they will be used to cook food and save money on utility bills.
