

Learn how FuelCell Energy's comprehensive services assist our customers around the world. ... FuelCell Energy delivers efficient, affordable, and clean solutions to enable a world empowered by clean energy. For Investors. Financial Information; Stock Information; FAQs; Contact Investor Relations; More Information. Careers;

DOE's Office of Fossil Energy has selected 16 projects to receive \$10.2 million in funding to advance solid oxide fuel cell (SOFC) technology. ... Development of Agile and Cost Effective Routes for Manufacturing Reliable Ceramic Components for SOFC Systems--Saint-Gobain Research ... Fuel Cell Technologies; Clean Energy; Fossil; Commercial ...

Former logo. FuelCell Energy, Inc. is a publicly traded fuel cell company headquartered in Danbury, Connecticut designs, manufactures, operates and services Direct Fuel Cell power plants, which is a type of molten carbonate fuel cell.. As one of the biggest publicly traded fuel cell manufacturers in the U.S., [3] the company provides clean energy in over 50 locations all over ...

Fuel cells generate electricity and heat through an electrochemical reaction, contributing to ultra-clean baseload power and providing a backup solution. FuelCell Energy offers a unique decarbonization platform with the ability to capture CO₂ and simultaneously generate power -- whether the fuel cell runs on natural gas or biogas.

FuelCell Energy is enabling a world empowered by clean energy with a platform based on fuel cell technology. ... Our complete waste to energy solutions convert biogas into ultra-clean heat and power. Explore. Decarbonize power. We believe in a world where everyone can benefit from low to zero-carbon power. Our platforms can provide flexible ...

At HDF Energy, we are leading in the development of cutting-edge energy solutions and our multi-MW fuel cells are key to unlocking a more sustainable future. These advanced fuel cells convert hydrogen into clean electricity, making them a strategic element in our hydrogen power plants. ... "Hyshunt", combining CAPTRAIN's locomotives and ...

Down-to-Earth ESG reporting By using plain and clear language, we report in a way that is transparent and accessible to our stakeholders. We report in accordance with the Global Reporting Initiative (GRI) Standards as well as the Sustainability Accounting Standards Board (SASB) Fuel Cells & Industrial Batteries Sustainability Accounting Standard.

INOCEL is an innovative French company specializing in the design and development of high power hydrogen fuel cell systems. Its expertise includes the development of fuel cell technologies and their

integration into a complete system. INOCEL's history is marked by the desire to revolutionize the clean energy market, with a vision for the future, in particular by contributing ...

FuelCell Energy Inc. is joining hands with E.ON SE unit E.ON Business Solutions to offer customers across Europe financial solutions ranging from power purchase agreements, capital leases and attractive purchase options. "With E.ON, FuelCell has a partner who understands both the value and environmental benefits of our solution, is excited about ...

Start here to check out use cases for fuel cell electricity production. ... FuelCell Energy delivers efficient, affordable, and clean solutions to enable a world empowered by clean energy. For Investors. Financial Information; Stock Information; FAQs; Contact Investor Relations;

Black & Veatch's expertise lies at the very heart of energy, water, transportation, O&G, chemicals and the digital worlds. Our consistent ranking as a top engineer and construction partner for power, telecommunications, transportable fuels and water infrastructure positions us at the leading edge of integrated hydrogen solutions needed for a decarbonized world.

Collaborative Efforts in Sustainable Fuel Development Key Partnerships. In a joint effort with Canadian Nuclear Laboratories, Expander Energy Inc., Nuclear Promise X, and St. Marys Cement, FuelCell Energy is spearheading the development of synthetic diesel fuels that boast low carbon intensity. This initiative utilizes zero-carbon hydrogen produced through the ...

Installation of a 14.9 MW fuel cell park in Bridgeport, Connecticut and a 59 MW fuel cell park in South Korea (the largest fuel cell park in the world). 2016 FuelCell Energy establishes generation portfolio and enters in a joint development agreement with ExxonMobil for CO₂ capture.

Grids with high solar adoption may over-generate during the day and under-generate as the sun sets and energy demand rises. FuelCell Energy's solid oxide electrolysis (SOEC) platform, currently under development, aims to balance time gap problems in the market by producing and storing hydrogen -- so that energy from wind and solar energy can ...

FuelCell Energy's platforms can be configured as a building's primary power source, making them an ideal solution for decentralized data centers looking for reliable energy. Fuel cells generate electricity and heat through an electrochemical reaction, contributing to ultra-clean baseload power and providing a backup solution.

Saint-Gobain recognizes the critical need to decrease the CO₂ footprint and energy demand worldwide, offering innovative solutions for efficient, comfortable building envelopes and distributed energy generation. Our key products for ...
