CFRP, a cutting-edge material, guarantees optimum strength and low weight. Stornetic's expertise in using this material allows an EnWheel to operate at up to 45,000 revolutions per minute. This extremely high rotational speed allows to maximise kinetic storage capacity, while only requiring a small machine footprint.

DuraStor is a smart power storage solution that can help overcome these power supply weaknesses, avoiding capital and production losses. Our modular power storage solution protects against unacceptable short-time voltage fails, and bridges the power supply to safely shut down your critical processes, or even to switch on additional power generators in standby.

For every new installation Stornetic experts are on hand to support customers. Depending on the business case, we can offer any level of assistance, from designing and delivering a concrete foundation for the flywheel system, to simply plugging it in.
