

How much electricity is produced in El Salvador?

The institution currently has a total installed capacity of 204.4 MW and a net production equivalent to 21.8% of the electrical energy produced in El Salvador. CECOSA, a CEL subsidiary, is a company dedicated to the generation of electrical energy through small hydropower plants.

Does El Salvador need a regional energy strategy?

El Salvador benefited greatly from regional energy integration and plays an active role in the MER. The country should therefore incorporate the Regional Energy Strategy 2030 in its national long-term planning efforts. This is in line with the country's overall development strategy and assures the participation of both public and private sectors.

Does El Salvador comply with regional interconnection requirements?

El Salvador complies with regional interconnection requirements and provisions in transmission expansion planning at the national level. This is thanks to the growing number of transactions within both the regional market and the integrated national electricity system within SIEPAC.
