

Why is Saudi Arabia investing in solar energy?

Leveraging its abundant sunshine and vast desert areas, Saudi Arabia is now pivoting to solar energy, aligning with its Vision 2030 plan to diversify its economy and ensure sustainable growth by reducing oil dependency and investing in renewable energy.

How much solar power will Saudi Arabia have by 2032?

The Saudi agency in charge of developing the nation's renewable energy sector, KACARE, announced in May 2012 that the nation would install 41 gigawatts (GW) of solar capacity by 2032. It was projected to be composed of 25 GW of solar thermal, and 16 GW of photovoltaics.

Will Saudi Arabia install solar power in 2030?

In March 2018 Saudi Arabia announced that together with Softbank they plan to install 200 GW of solar power through 2030. This compares to a global solar power installation of 100 GW in 2017 and a total installed capacity of 77 GW in Saudi Arabia in 2016. This project was cancelled in September 2018.

When did Saudi Arabia start using solar energy?

According to Khan, the historical timeline of Saudi Arabia's engagement with solar energy dates back to the 1960s, with significant acceleration observed post-2010 through the launch of various solar initiatives and projects.

Why is solar power important in Saudi Arabia?

Solar power in Saudi Arabia has become more important to the country as oil prices have risen. In 2021, 60.89% of energy consumed was produced by burning oil.

Where in Saudi Arabia is solar power coming from?

Key locations include Sakaka in Al Jouf Province, Al Shuaibah in Makkah Province, and Sudair in Riyadh Province, among others. These projects capitalize on Saudi Arabia's geographical position and favorable weather conditions to generate solar power. Solar energy is set to expand nationwide.

The Spanish company ESFC offers financing and construction of solar power plants in Saudi Arabia under an EPC contract. Our team offers energy project management and general contracting for the construction of solar power plants. EPC contracting is currently the most widely used model for large energy projects.
