Schimper is credited with coining the term "chloroplast" in 1883. He proposed that chloroplasts are descended from cyanobacteria through a process called endosymbiosis. Schimper's work laid the foundation for the endosymbiotic theory, which explains the origin of ...

Andreas Franz Wilhelm Schimper (12 May 1856 - 9 September 1901) was a German botanist and phytogeographer who made major contributions in the fields of histology, ecology and plant geography. He travelled to South East Asia and the Caribbean as part of the 1899 deep-sea expedition. He coined the terms tropical rainforest and sclerophyll and is commemorated in ...
