

## Are emerging energy paths in Senegal based on EEG?

This study provides a contribution to fill that gap by exploring the emerging energy paths in Senegal through the lens of EEG, using the framework of regional path creation processes to analyze qualitative interview data from 17 experts in the Senegalese energy sector.

## Will path transplantation contribute to achieving energy goals in Senegalese?

Still, these large scale projects realized through path transplantation are expected to contribute substantially to meeting the energy goals set by the Senegalese government - the share of renewable energy in the electricity mix to reach 20 % by 2020 and 23 % by 2030 .

## Why did FMO sign a flagship project in Senegal?

Huib-Jan De Ruijter, Co-Chief Investment Officer at FMO said: " Through the signing of this flagship project, FMO is delighted to mark its continued commitment to Senegal's vision for a sustainable energy sector.

## Who regulates electricity in Senegal?

These include the Ministry of Petrol and Energy, the Regulatory Commission of the Electricity Sector (CRSE-Commission de r gulation du secteur  lectrique), the Senegalese Agency for Rural Electrification (ASER-Agence S n galaise d'Electrification rurale), the National Agency for Renewable Energy (ANER), and Senelec.

### What is the second emerging path in the Senegalese energy sector?

The second emerging path in the Senegalese energy sector arises from the mini-grids and stand-alone solutions, markets not yet penetrated by foreign investors. These give local companies an opportunity to shape the market according to their capabilities, the needs of the population, and local conditions.

## How are solar energy potentials exploited in Senegal?

The potentials have already been exploited with large-scale projects via Independent Power Producers (IPPs), with the first solar parks commissioned in 2016 and 2017. It is also important to note that oil and gas fields were first discovered in Senegal in 2014. Their exploitation was to begin in 2020.

AENAOS Energy Systems has completed the licensing, study and construction of one more Photovoltaic Net Metering Station, with a power of 970 kW, for the company ESKARCOM SA at its central facilities in the ...

1 ¶ In 2023, in partnership with IRENA and GIZ, the Senegal Ministry of Energy, Petroleum and Mines (MEPM) is implementing a training programme to build capacity in long-term ...

Senegal has rapidly increased its renewable capacity, in large part to decrease historical dependence on

expensive and polluting liquid fuels. The country pledged to source 30% of its generation capacity from ...
