

Will solar be Senegal's cheapest energy source?

The planned Scaling Solar projects underscore Senegal's commitment to integrating renewable energy resources into its energy mix. The successful tender set a new benchmark for the region. With prices under 4 US cents per kWh, solar energy will become Senegal's cheapest energy source. Questions or Interest? Subscribe to our mailing list.

Does Senegal have access to electricity?

The competitive tendering was led by Senegal's Energy Regulatory Commission (CRSE). Although the proportion of Senegalese people with access to electricity has increased sharply over the past 30 years, nearly a quarter of the population still lacks access.

Can Senegal become an emerging economy by 2035?

Senegal's government wants to become an emerging economy by 2035 and the energy sector is one of the major components of Senegal's growth. Rural areas remain the most challenging areas to install power grids. However, with low incomes, rural people struggle to afford the high costs of electricity.

Image: Solar roof photo created by tawatchai07 - &gt;Tawatchai07 via Freepik Senegal's recently inaugurated Abdoulaye Wade Stadium, located in Diamniadio in the capital city Dakar, will be solarized. In line with the country's renewable energy agenda, the 50,000-seat stadium will be connected to a 2MW solar photovoltaic power plant.

The town of Kahone, located in the Kaolack region, hosts the largest photovoltaic plant in Senegal, a project that can generate electricity for around 300,000 people at a low price and reduces CO2 emissions, as part of ...
