

What are some examples of shared energy storage demonstration projects?

At present, shared energy storage demonstration projects have been launched at home and abroad. In 2009, the "Economic Grid" project of SENECS in Germany (De Fusco et al., 2016) proposes the "Free Lunch" business model.

How can shared storage improve energy systems?

By integrating shared storage into these projects, system operators can better manage their energy resources, improve grid stability, and support the transition to renewable energy sources. This model fosters participants cooperation and investment, leading to more sustainable and resilient energy systems.

What is shared energy storage?

Shared energy storage is generally applied in the supply, network, and demand sides of power systems. The shared energy storage at the supply side is mainly utilized for renewable energy consumption (Zhang et al., 2021). The proportion of renewable energy is greatly increasing due to the continuous promotion of "carbon peaking and neutrality".

Does shared energy storage sharing provide a fair distribution of benefits?

To ensure a fair distribution of cooperative benefits, we introduce a benefit allocation mechanism based on contributions to energy storage sharing. Utilizing realistic data from three buildings, our simulations demonstrate that the shared storage mechanism creates a win-win situation for all participants.

How do we integrate storage sharing into the design phase of energy systems?

We adopt a cooperative game approach to incorporate storage sharing into the design phase of energy systems. To ensure a fair distribution of cooperative benefits, we introduce a benefit allocation mechanism based on contributions to energy storage sharing.

What is a shared Energy Storage pricing mechanism?

The pricing mechanism is a strategy for customizing the price of shared energy storage services under the premise of coordinating the interests of buyers and sellers. It is also the fundamental guarantee of shared energy storage operators' profitability and the reflection of users' willingness to purchase.
