

Is solar energy a good source of energy in Cambodia?

Solar energy in Cambodia is the country's second most promising clean energy source behind hydropower. Hydropower remains Cambodia's most developed renewable energy source but also has its own challenges - such as yearly variability due to droughts and floods.

Is solar power transforming remote communities in Cambodia?

Solar power is transforming remote communities in Cambodia with affordable, renewable energy and the chance to live more productive lives. However, hundreds of other villages remain off the grid, and energy experts say Cambodia should be doing more to harness the country's immense amount of untapped sunlight.

How many solar PV projects are there in Cambodia?

Scores of seven solar photovoltaic (PV) projects are in the pipeline for construction and planned for operation by 2023. The Cambodian government aims to generate 20 percent of energy from renewable energy. This is our guide to Solar Energy in Cambodia.

Can solar power help Cambodia achieve national electrification goals?

Searching for alternative options, Cambodia joins a growing list of national governments who have come around to seeing solar and other distributed, emissions-free renewable energy resources as a cost-effective means of achieving national electrification, as well as national and international climate change and renewable energy goals.

Will solar power be a key part of Cambodia's Power Development Plan?

The country recently approved the Power Development Masterplan (2021-2040), covering an inspiring goal of increasing solar PV capacity to 1,000 MW by 2030 and 3,000 MW by 2040. Solar generation will need to be a key part of Cambodia's efforts to expand access to affordable power while also transitioning to cleaner energy.

Why is solar development important in Cambodia?

Solar development will increase investment in modernising the existing energy infrastructure. Plus, off-grid solar and micro-grids will help electrify rural regions that often face the largest energy access issues. Finally, Cambodia's energy prices are some of the highest in the ASEAN.
