

Who is franklinwh?

FranklinWH is a research-driven company focused on next-generation residential energy management and storage solutions. Headquartered in the San Francisco Bay Area, FranklinWH's team has decades of experience in energy systems, from design, through manufacturing, to sales and installation.

Where can I buy Franklin WH?

FranklinWH is available in distribution via BayWa r.e., Greentech Renewables, Inception Energy, Fortune Energy, The Power Store, Van Meter, Inter-Island Solar Supply, R&R Solar Supply, and SolWel. FranklinWH's ascent in home energy storage is due to its flagship system, Franklin Home Power (FHP), which is more robust than a typical ESS.

What is a Franklin home power system?

The company currently offers a single energy storage system model it calls Franklin Home Power system, or FHP for short, and it's been turning heads in the industry and the marketplace. FranklinWH says the FHP can do whole-home backup (the WH in the company's name stands for "Whole Home").

Is franklinwh a 'whole home solution'?

When a completely new name like FranklinWH made its initial U.S. rollout at Intersolar 2022, touting a true "whole home solution," I was curious how it would fare. One year later, and FranklinWH has arguably made more strides than any other home ESS company.

Why is franklinwh so popular?

FranklinWH's steady ascent is definitely due to the merits of its flagship system, Franklin Home Power (FHP), which is more robust than a typical ESS.

How does the franklinwh app work?

The FranklinWH app allows you to monitor and manage your system remotely from your mobile devices. As an AC-coupled battery system, the FHP system can be integrated into existing solar systems much more easily than a DC-coupled battery system - as long as it's compatible with the solar inverters. According to FranklinWH's customer support articles:

With the FranklinWH app, homeowners can manage your Franklin Home Power (FHP) system anytime, anywhere. The FranklinWH app monitors your home electricity consumption 24 hours a day, tracking solar, grid, battery and generator supply and home consumption. It provides usage statistics for time periods including year, month and day.

FranklinWH's steady ascent is definitely due to the merits of its flagship system, Franklin Home Power (FHP), which is more robust than a typical ESS. FHP is a whole-home energy management solution that

integrates solar, ...

Solar Power World, a renowned authority in the solar and renewable energy sector, organizes annual voting ...

So, what about the "WH" after Franklin? As shouldn't be a surprise, coming from a company focused on R& D, it's the brainchild of a bunch of tech geeks - our founders. "WH" initially stood for "watt-hour," using the unit of energy to reflect the company's mission of creating optimized home energy management systems.

aPower 2. Whole home backup can be achieved in most cases with a single aPower 2 due to its robust 15 kWh capacity, 10 kW discharge rate, 185LRA output for large HVAC usage and 8 kW charge rate.

Note: If you are experiencing Wifi connection issues, check your network connection type or check your network signal strength. If your Wifi signal is weak, consider using a Wifi extender or powerline adapter if they meet the supported 10/100 Mbps standard. If you change your Wifi password after the system is

connected, the system will be unable to connect and you'll need ...
