

How many MW are there in Slovak solar power?

While the so-called solar boom was not as intensive as in some other Member States, for instance, in Czechia, the Slovak electricity market still experienced a rise of installed PV capacity by over 300 MW in a single year. 573 MW. The past development of solar PV capacities is illustrated in Graph 2 provided below.

Does Slovakia have a rooftop solar energy potential?

According to the report Rooftop Photovoltaic Energy Potential in Slovakia (2023), drafted for SAPI by Energiewerkstatt, Slovakia has a theoretical (realisable) rooftop PV potential of around 37 GW.

How can Slovakia stay on track with solar PV?

In order to stay on track, Slovakia needs to implement the total of 2,855 MW in solar PV plants by 2030. Hence, this scenario requires a clear action of the Slovak Government and a preparation of an enabling investment environment that would allow for a rise of new solar PV capacities.

Who is the off-taker of Slovakia's solar?

Energy company Slovensk&#253; plyn&#225;rensk&#253; priemysel will be the off-taker. Slovakian solar could be set for a much-needed boost. Slovakia's state-owned energy company Slovensk&#253; plyn&#225;rensk&#253; priemysel (SPP) has been chosen in a government tender to be the sole buyer of electricity produced as a result of forthcoming generation capacity auctions.

Why are new solar PV plants being installed in Slovakia?

Soaring energy prices, new reserved capacities for renewables, and a few incentive schemes, among other factors, are likely to result in new large-scale solar PV plants being deployed in Slovakia, significantly increasing the installed capacity in coming years.

What will Slovakia's solar market look like?

Solar will be top dog, according to Oenergetice.cz, with a 44% share and hydropower will claim the balance with wind set to be left in the cold. Slovakia has witnessed only a limited increase in residential and commercial installations in the last year as large scale solar has dried up completely.
