

What is Slovakia's national energy and Climate Plan?

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030.

What percentage of Slovakia's electricity comes from fossil fuels?

In electricity generation, nuclear energy had a 56 % share in 2019, while renewables accounted for 23 %. Only 21 % of Slovakia's electricity came from fossil fuels in 2019. Slovakia will stop supporting coal mining and electricity production from coal by the end of 2023.

What is the energy policy in the Slovak Republic?

The development of an energy policy in the Slovak Republic is aimed at optimizing the energy mix so that GHG emissions and pollutants are reduced as much as possible while maintaining and responsibly increasing energy security and affordability of different types of energy. The EP SR also includes science, research, and innovation.

What is the priority of the Slovak Republic in the energy sector?

The priority of the Slovak Republic in the energy sector is to ensure synergy between sub-policies, cost efficiency, enforcement of the principles of sovereignty in the energy mix, preservation of competitiveness and energy security.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

Why is energy security important in the Slovak Energy Strategy?

With high dependency on energy imports, energy security is one of the priority topics of the Slovak national energy strategies. This provides a good basis for further developing the energy security dimension in the final plan, with objectives and policies and measures clearly described.

Slovakia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030. To ensure the security and affordability of electricity ...

Battery Energy Storage System has been implemented at our production plant in Slovakia. This system serves to test functionalities and parameters while also offering services to optimize costs associated with the operation of the plant ...
