

What is IET smart grid?

IET Smart Grid is a gold Open Access journal that aims to disseminate cutting-edge research results spanning over multiple disciplines including Power Electronics, Power and Energy, Control, Communications, and Computing Sciences, to pave the way for implementing more efficient, reliable and secure power systems.

Why do we need smarter and more resilient grids?

Investments in smarter and more resilient grids will be necessary to accommodate the greater deployment of renewable energy and enhance energy security. Digital technologies designed for power systems are instrumental to unlock essential system services required to integrate high shares of variable renewable energy.

What is a smart grid?

Smart and embedded systems that combine distribution management systems, advanced metering infrastructure and data from substation gateways to shape the grid similar to the internet, with the ability to self-diagnosis and self-healing - that's the vision of many in the smart grid industry.

Is a smart grid a good investment?

However, it may not always mean that it is doing better than the competition. A high number of mentions of smart grid in quarterly company filings could indicate either that the company is reaping the rewards of previous investments, or that it needs to invest more to catch up with the rest of the industry.

Which companies are best positioned to take advantage of smart grid disruption?

Iberdrola and Engie are among the companies best positioned to take advantage of future smart grid disruption in the power industry, our analysis shows. How can hydrogen ride the sustainability wave?

What does a high smart grid number mean?

Higher numbers usually indicate that a company has spent more time and resources on improving its smart grid performance, or that smart grid is at least at the top of executives' minds. However, it may not always mean that it is doing better than the competition.

Develoepnr SNRG has set a target to install 300MWp of rooftop-based solar and 250MW of commercial battery energy storage by 2028 using its SmartGrid technology. Antin Infrastructure Partners acquired a controlling ...

The list of projects is therefore long and includes a wide variety of initiatives, technologies and mitigation measures alongside the hundreds of (mostly) solar-plus-storage microgrids, including enhancements to the grid ...

An Intersium&#174; Max 20 containerized lithium-ion (Li-ion) Energy Storage System (ESS) helps an island community to maximize its self-consumption of renewable energy. Pellworm Island, off the North Sea coast of Germany, represents a ...

IET Smart Grid is a gold Open Access journal that aims to disseminate cutting-edge research results spanning over multiple disciplines including Power Electronics, Power and Energy, Control, Communications, and Computing ...

Using Ixxat SG-gateways from HMS Networks, customers can link BESS applications with the smart grid. The combination of energy, industrial and building protocols, comprehensive security functions, various interfaces ...

According to planning documents, the BESS will store renewable energy from the National Grid network and the data centre that will also be at the site aims to be carbon neutral, through on-site renewable ...

An Intersium&#174; Max 20 containerized lithium-ion (Li-ion) Energy Storage System (ESS) helps an island community to maximize its self-consumption of renewable energy. Pellworm Island, off ...

3 ???&#0183; The latest International Energy Agency report highlights that global energy demand is increasing, rebounding following a brief dip during the COVID-19 pandemic in 2020, as shown ...

Investments in smarter and more resilient grids will be necessary to accommodate the greater deployment of renewable energy and enhance energy security. Digital technologies designed ...

Battery energy storage developer Eku Energy has reached a financial close for 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital Territory (ACT). The 2-hour duration ...
