

What is sunsys PCS2?

SUNSYS PCS2; (IM) can limit the impact of increases in the electricity retail price by supplying the load to cut peak demand (peak shaving), maximising PV energy self-consumption at building or community level. Page 10 of Grid support: Meet the challenge of demand-response energy balance.

How can sunsys PCS2 reduce peak consumption?

o Behind-the-Meter Energy Storage: Reduce peak consumption and maximise PV energy self-consumption. SUNSYS PCS2; (IM) can limit the impact of increases in the electricity retail price by supplying the load to cut peak demand (peak shaving), maximising PV energy self-consumption at building or community level.

Why should I contact socomec?

Please contact SOCOMEC for the correct configuration of the PCS according to the specific plant requirements. Please contact SOCOMEC for the correct configuration of the Battery according to the specific battery installed. 12.

What is socomec's liability?

SOCOMECS liability shall be limited, in its discretion, to the repair or replacement at its expense in its factory of all or part of the SUPPLY recognized as defective. CAUTION! If the unit is found to be damaged externally or internally, or any of the accessories are damaged or missing, contact SOCOMEC.

What is a socomec shelf?

The Socomec shelf can be used to facilitate the insertion of the upper three modules. The shelf can be used only by persons authorized by Socomec. Keep this shelf available to service people for commissioning or future maintenance activities. Page 25 - Make sure the shelf is properly assembled.

Socomec is a 100+ years old company with expert knowledge in power conversion, switching and monitoring. ... SUNSYS HES XXL systems, including inverter, batteries and control cabinets, are certified and tested. Our systems have undergone a type-testing procedure to guarantee reliable behavior and performance, reducing the time and effort ...
