

What is a solar battery warranty?

Solar battery warranties vary by manufacturer and product. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery.

Should I get a warranty on a solar panel system?

A solar panel system is a multi-decade investment that a warranty can help protect. The less solar power your system produces, the more your home may need to draw from the utility company, which eats into your savings.

How long do solar batteries last?

But in general, most home lithium-ion based solar batteries should last at least 10 years. How many years are solar batteries covered under warranty for? The typical battery warranty lasts 10 years, but cycle and throughput clauses in your warranty could shorten your warranty term a bit.

Does a battery storage system need a warranty?

A battery storage system is a decades-long investment that a warranty can help protect. The less power your system stores, the more your home may need to draw from the utility company, which eats into your savings. A good warranty ensures that if your battery experiences a problem, that it will be replaced and your investment will be protected.

Does a solar panel warranty cover labor costs?

Solar panel warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment. Comparisons should focus on product warranty terms, power guarantees, labor warranty terms, transferability and bankability, and the availability of an extended warranty.
