

They also note that traditionally, the fall-winter period has always been considered a time of low demand for houses for sale in Russia; however, the opposite is now the case. Here are the Moscow real estate categories to consider when buying a house in Russia: By direction and location (Rublyovka, Novaya Riga, Barvikha);

Passive solar house plans are designed to maximize energy efficiency and reduce reliance on non-renewable resources. Here's a look at some of the key features that make these homes stand out: Large Windows. Large windows are a hallmark of passive solar design. Positioned to face the sun, typically south in the Northern Hemisphere, these ...

Russia's First Active House has proved it can cope with even the harshest Russian winter. It stayed warm during its first New Year's Eve, even as the outdoor temperature plummeted to -30°C. Integrated Solar Collectors contributed to the heating, while the facade's multiple layers of wood minimised thermal bridges, and heavy plaster in ...

Hevel Group is also the largest investor in solar parks in Russia and CIS - with 1.6 GW project pipeline in different regions. Hevel Group proved to be one of the world's leading industrial producers of HJT PV cells and modules, with our products being shipped to various regions, including the EU countries, India, Japan and others.

According to GlobalData, solar PV accounted for 0.75% of Russia's total installed power generation capacity and 0.26% of total power generation in 2023. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Russia Solar PV Analysis: Market Outlook to 2035 report. Buy the report here.

Russian architect and professor Pavel Kazantsev has won the Energy Globe Award for his solar-heated house Solar-5. The house has been adapted for the far east of Russia, around the city of Vladivostok.

The power station will become the largest solar energy facility in Russia. 01 -- 03 -- 2021. Russian government unveils plan to add 7 GW of renewables till 2035. Russian government is expected to pass a new decree that will see to build 7 GW of solar and wind by 2035. Once approved the forecast for 2035 can be raised to around 13 GW with near ...
