Bangladesh looks to generate 40% of its energy from renewable energy sources by 2040. At present, it generates about 910 MW renewable energy. The government recently issued the National Solar Energy Roadmap (SREDA) draft that targets about 40 GW of solar power in which 40 per cent will come from rooftop installations.

Bangladesh's largest solar power plant in Mymensingh is fully installed with the Huawei Smart photovoltaic (PV) solution, through which it has been now connected to the national grid recently. The 73 MW PV power plant would help meet the government's target of generating 10 percent of the country's total electricity using renewable energy by 2021, read a press release.

In 2023, Huawei delivered a 100 MW Utility project for distribution to the national grid and Bangladesh's largest and first-ever microgrid with a 22 MWh ESS capacity at Monpura Upazila. The company also ...
