

How many solar PV installations are there in Denmark?

The latest version can be found below and shows a total expansion of solar PV in Denmark of more than 3.3 GW as of 1 July 2023.. The installations consist of both large installations in the open country as well as smaller installations, mainly on rooftop. Solar PV Statistics 2nd quarter 2023 (Only available in Danish)

What is Danish solar energy?

Danish solar energy releases the world's most efficient selection of colored solar modules. This ingenious technology is especially interesting for the building industry, where solar energy can be integrated 100% in the building so that roofs and facades in practice become energy producing.

Who can buy and sell solar panels?

With DanSolar, you get a strong and highly experienced solar cell supplier. In principle, anyone can buy and sell solar panels, but only a few can configure systems like DanSolar and offer turnkey contracts in connection with the design, setup, assembly and installation of both ordinary systems and solar parks. We have many years of experience.

Who are DSE solar components distributors?

DSE is the official distributor for some of the well known solar components producers like Fronius, ABB, Steca, MorningStar, Grundfoss, Victron Energy, Hoppecke etc. Based on our in-depth PV technology knowledge and insight in the solar components market, we are capable of selecting the right quality products without any compromise.

Should Denmark be independent of fossil energy sources?

In the long term, Denmark must be independent of fossil energy sources, and since the operation of buildings accounts for approx. 40% of the total energy consumption in Denmark, it is necessary to have a tight but realistic strategy for both new construction and energy renovation of existing buildings.

What is the first solar facade in Copenhagen?

THE FIRST SOLAR FACADE AT A LISTED BUILDING IN COPENHAGEN. A beautiful facade solution with red high-efficiency CFR solar cells in one of Copenhagen's many red stone properties. The first first red solar cell facade solution in Copenhagen, and probably the first in the world.
