

7.5 HP Solar water pump system is the most powerful solar product which is available in India. With the help of the solar panels, the solar water pumps absorb the solar energy and then convert the energy into the Direct current which is used to power the motors of the pumps. The 7.5 HP solar water pumps have dual operation modes and thus they can be operated by solar power as ...

A 30 hp motor, will consume about 900W per Hp, which works out to 27,000 watts. That would require a 30KW array to reasonably provide power, for daytime pumping only. I suspect you have a 3 phase motor, which will require a 3 ...

Brighten Haiti takes end-of-life, low power, obsolete, safe, functioning silicon-based solar panels (sorry, no Cad Tel modules), from project owners, EPC's, distributors, and manufacturers. We aggregate and test them for safety and usable power, at a US "collection site". Then ship them to Haiti. Safety is our highest priority.

18.5 kW (25 hp) solar pump inverter, AC 37A output at 3-phase, DC voltage range (280V~750V), works at (-10%#176;C, 40%#176;C). Come with a built-in MPPT controller, a solar pump inverter supporting AC and DC input has intelligent track maximum power point, and automatic regulation of pump flow, which converts DC 450V-750V from the solar panel to 3-phase AC voltage.
