

Is a solar startup a solution to Haiti's low-cost electricity crisis?

With the demand for low-cost electricity being so high in Haiti, businesses are starting to emerge and are combating the frequent problems residents endure. One company, known as 10Power, is a solar startup partnering with locals to install and provide financing for solar energy projects in Haiti's rural areas.

Is Haiti a good place to install solar power?

The domestic market in Haiti for reliable clean energy systems is largely untapped, with electricity demand expected to increase by 50% by 2030. The island's tropical climate makes it an ideal location for solar deployment.

Can wind power deliver electricity in Haiti?

Estimates suggest that wind power can deliver electricity at 30-50% of the cost of solar energy in windier areas. Though there are no plans to build wind farms in Haiti, the construction of a power plant did begin in 2017. Not only will the plant optimize wind but it will also be the first to utilize a mixture of wind, solar and diesel energy.

Is hydroelectricity a viable alternative to energy in Haiti?

One alternative that Haiti is trying to integrate into its systems is hydroelectricity, which is power that water generates. Of all the renewable options available, hydropower has contributed the most to Haiti's energy supply.

What is 10Power & how does it work in Haiti?

One company, known as 10Power, is a solar startup partnering with locals to install and provide financing for solar energy projects in Haiti's rural areas. It was responsible for installing solar arrays at two of Haiti's water purification centers, which provide water to local communities and support more than 600 microbusinesses.

Does Haiti have a grid system?

Today, Haiti's rural southwest has implemented grid systems to provide electricity for 8,000 people across 1,600 households. While hydropower and solar power are at the focus of Haiti's developments, other solutions are also available and can address additional issues the country faces.
