The newly operating solar park in Eastern Slovakia occupies an area of 8.8 hectares, which is categorized as infertile soil. The power plant includes 10 582 PV modules with technology which will help avoid approximately 1 275 tons of CO2 emissions. ... Our company is also working intensively on several projects, not only in the field of solar ...

The Iliasovce plant alone will cover about 92% of the brewery's power demand, which is about 7.2 GWh per year. About 6% will be covered by the company's own solar plant, while the remainder will be supplied from sources with certificates of origin. There is, however, a plan to replace these in cooperation with Enery.

The power plant will go on line before the end of 2010. Slovakia attracts investors by its agreeable feed-in-tariffs (FITs), compensating each kWh of solar electricity with EUR 0.43 (USD 0.54). This will be

Phoenix Solar's first project as general contractor in Slovakia. You can subscribe to our M& A newsletter here (EUR 1 = USD 1.272)
