

Why should you install solar panels in New Zealand?

Solar panels are a clean and renewable source of energy. By harnessing the power of the sun, we can reduce our reliance on fossil fuels and lower our carbon footprint. There are numerous benefits to installing solar panels in New Zealand. One of the main advantages is the potential for significant cost savings on your energy bills.

How much does solar power cost in New Zealand?

According to the Electricity Authority, the average size of a residential solar power system installed in New Zealand today is 4.4 kW, which would cost roughly \$12,600*fully installed. A 4.4 kW solar power system would include 10 or 11 solar panels (depending on the size of the panels) and a 4 kW or 5 kW inverter. Is Solar Power Worth It?

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

How will New Zealand's energy bills compare to home solar?

New Zealand household energy bills have steadily increased by 3% per year in recent years, and are set to double by 2028, whereas the price of a solar energy system will likely decrease. So, these numbers will only continue to improve in favour of home solar! Increased property value

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

Do solar panels need sunlight in New Zealand?

New Zealand has abundant sunshine and generates between 1,700 and 2,100 sunshine hours annually. Some areas, like Nelson and Gisborne, receive as much as 2,400. Solar Panels don't require sunshine; they require daylight, so Solar Panels work year-round, even in the lower South Island. How many Panels do I need?

Solar panel installation process. The installation process for solar panels in New Zealand typically involves several steps. First, a site assessment is conducted to determine the suitability of your property for solar panel installation.

From using the solar calculator, the estimated annual solar generation can be found for any home in New Zealand. Using the example of a 5kW solar power system on a 20-degree, north-facing roof on a home in Grey

Lynn, Auckland, the solar power system will generate 7,030kWh of solar energy in a year.
