

Does Guam have plans for a solar farm?

Guam has announced plans for several large solar farms. The island has adopted a renewables policy that requires the reduction of fossil fuel consumption by 2020 to 20% less than the rate in 2010. Another requirement is for 5% of electricity in 2015 to be from renewables, increasing to 25% by 2035. A net metering program began in 2009.

Will my home solar system work during a power outage?

If your home solar system is tied to your utility (grid-tied) and you don't have a battery, your home solar system will not work during a power outage. You will not be able to produce or consume solar energy while the grid is down. In order to have power during a power outage, you will need a home solar + battery storage system. *

What kind of inverter does GoSolar use?

GoSolar uses high efficiency low cost \$/watt micro-inverters by NEP(TM). Founded in 2010 in Silicon Valley California, NEP(TM) engineers and produces competitively priced high-quality micro inverters. In fact, the NEP(TM) micro inverter is the only certified and commercially available micro inverter in Japan.

The project supplies enough clean energy to power 10,000 households. The project consists of 120,000 modules. Development status The project got commissioned in October 2015.
