

Why is Mali launching a 200 MWp solar power plant?

Loading... Mali's President Assimi Goïta has launched a 200 MWp solar power plant project with NovaWind, a Rosatom subsidiary, to address the nation's electricity crisis and promote sustainable energy. The EUR200 million investment aims to supply 10% of Mali's electricity within 12 months.

Why is Mali building a new solar power plant?

As Mali grapples with an ongoing electricity crisis that hampers economic growth, transitional President Assimi Goïta laid the foundation stone for a new 200 MW photovoltaic solar power plant. The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector.

What is Mali's first IPP solar project?

The EUR77 million (\$91.3 million) PV plant is Mali's first IPP solar project. Akuo Energy secured a 28-year power purchase agreement for the array from Mali's power utility, Energie du Mali-SA, in October 2015.

What is Touna solar power station?

Touna Solar Power Station, is a planned 93 MW (125,000 hp) solar power plant in Mali. The privately owned power plant is expected to sell the energy produced to the national electric utility, Energie du Mali (EDM-SA), under a power purchase agreement, which has already been signed, as of December 2020.

Which company is constructing a new energy plant in Mali?

The Russian company NovaWind, a subsidiary of Rosatom, is constructing the plant, marking a significant step in the country's energy sector. In recent weeks, Mali's transitional government has intensified efforts to implement this solution nationwide.

How much PV capacity does Mali have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Mali had installed just 20 MW of PV capacity by the end of 2019. This content is protected by copyright and may not be reused.

The findings reveal that a substantial part of Mali's land is suitable for solar PV and wind energy projects. Specifically, the study estimates that Mali could potentially develop ...

A recent report by IRENA provides insights into Mali's potential for large-scale solar photovoltaic (PV) and onshore wind projects. The analysis identifies zones in Mali that ...

In Mali, 75% of people living in rural areas do not have access to electricity. Foundation Rural Energy Services (FRES) provides villages with electricity via solar-powered mini-grids. Mini-grids offer multiple

opportunities ...

According to the report published by Virtue Market Research, in 2022, the Global Solar Powered Electronics Market was valued at \$27 billion, and is projected to reach a market size of \$47.09 ...

The project aligns with the Bank Group's Desert-to-Power initiative, which is set to become the world's largest area of solar power generation. The initiative will increase solar production capacity by 100MW. It ...
