

Can Oman's power sector regulate rooftop solar panels?

The Authority for Electricity Regulation Oman (AER) - Oman's power sector regulator, is taking steps to pave the way for homeowners to install rooftop solar panels. Any surplus electricity generated can be sent back into the national grid.

Are rooftop solar panels a viable option in the Middle East?

Rooftop solar PV panels are common in a number of countries, but are only now gaining real popularity in the Middle East. Despite the sunny climates, there are still a number of barriers to switching to solar PV. Electricity tariffs are generally low, discouraging customers from switching to self-generated electricity.

Is investing in solar energy profitable in Oman?

Solar energy in Oman is expected to become progressively cheaper in the near future and could offer a good return for investments. The success of solar energy in Oman is merely determined by the government's regulatory policies, fiscal incentives, and public financing.

What is the solar power potential in Oman?

Oman receives a tremendous amount of solar radiation throughout the year, which is among the highest in the world. There is significant scope for harnessing and developing solar energy resources throughout the Sultanate.

Is the UAE a 'front runner' for solar PV?

The Middle East Solar Industry Association (MESIA) describes the UAE as a regional "front runner" for PV, with Oman starting to add more significant projects to the regional PV pipeline. Rooftop solar PV panels are common in a number of countries, but are only now gaining real popularity in the Middle East.

How many houses will Sahim cover in Oman?

The scheme aims to cover 10-30% of residential premises in Oman, translating to around 250,000 rooftop installations or roughly 1GW of solar capacity by 2025-2030. The pilot batch of Sahim will target 3000-5000 houses in Muscat to reach 100,000 houses by 2023.
