

How much does it cost to build a solar plant in Peru?

The driving force behind the initiative, ENEL, states that the plant's cost of \$170 million was funded by the multinational electricity provider and the European Bank of Investments. Rubí has a production capacity of 144.48 megawatts and is their first solar facility in Peru organised by ENEL's subsidiary company ENEL Green Power Peru.

Can a solar system work in Peru?

To implement a solar solution that would work on such a massive scale and in such varied climates,the Peruvian government has made a tender won by Tozzi Green,an Italian company specializing in products,services,and projects for the development of plants and the generation of energy from renewable sources.

Why is Peru a good place to live?

With mountainous regions,the Amazon rainforest,and a coastal region stretching more than 2900 kilometers,Peru is one of the most ecologically diversecountries on the planet. Explosive economic growth in population-dense urban areas has spurred the Peruvian economy into becoming one of the fastest-growing in the world.
