

How do I assemble my solariskit solar collector?

No tools are needed to assemble your SolarisKit solar collector. Next, connect your solar collectors to your above ground swimming pool using the fittings kit provided with your solar collector and a standard pool filter pump. Step 3: Switch on the Pump and enjoy!

Who are solariskit?

SolarisKit are the developers of the world's first flat-packed solar collector, a new solar hot water solution that is modern, attractive, simple to install, and easy to ship. Our solar collectors can provide carbon free hot water for homes, hotels, glamping/camping sites, and heating pools and hot tubs and spas.

Is the solariskit S400 a certified solar collector?

The SolarisKit S400 solar collector is fully certified to stringent European standards (ISO 9806 and EN 12975-1). From hail impact to over pressure testing, the S400 solar collector by SolarisKit has been designed to provide you with years of service. Solar Keymark Registration No: 011-7S3049 F, issued by DIN CERTCO on 31/7/2021.

Can solariskit provide carbon free hot water?

Learn how SolarisKit can provide carbon free hot water for your home or building in 60 seconds. From providing innovative solar solutions to design and manufacturing expertise, SolarisKit is your trusted solar thermal solutions partner.

How does the solariskit solar hot water system work?

The SolarisKit solar hot water system includes our own solar controller which monitors the temperature of the system. When it detects the solar collectors are warmer than tank water, it switches on the pump to start collecting heat. The process is fully automatic, just plug it in, switch it on, and it takes care of the rest!

How does solariskit work?

The SolarisKit solar collectors are connected together to form an array on your roof or ground turning solar energy into heat. The collectors are connected to an insulated hot water storage tank which stores all the hot water over the course of the day. Insulation reduces any heat losses from the tank.

BE Solar offers the best in solar electricity systems for Bermuda's harsh climate. We carry modular, completely integrated systems that are designed to expand with your growing needs or repair and replace over time.
