Solshare system Northern Mariana Islands

What are the components of a solshare system?

The Solshare system comprises several technical components: Solar Panels:Photovoltaic (PV) panels that generate DC electricity from sunlight. Inverter: Converts DC electricity from the solar panels into AC electricity suitable for household use.

What are the key features of solshare technology?

Solshare technology boasts several key features and components: Dynamic Energy Allocation:Solshare distributes solar energy to connected units based on their consumption patterns. Scalability: The system can be scaled to accommodate different building sizes and it's energy needs.

Can the solshare be accessed for service and maintenance?

If not,the SolShare cannot be accessed for service and maintenance. Please consult Allume's 'SolShare35_Datasheet' and 'SolShare_Installation_Manual_UK' for further details on dimensions and clearances. The SolShare has been tested and certified for IP56,qualifying it for installation in an outdoor,unconditioned environment.

Can solshare be installed across all UK networks?

All UK Distribution Network Operators (DNOs) and the Energy Networks Association (ENA) have reviewed and accepted SolShare for installation across all UK networks. Note: As SolShare is not a power generating device (PV inverter) it cannot and does not need to be 'type test' certified.

Can the solshare be installed outside?

The SolShare has been tested and certified for IP56,qualifying it for installation in an outdoor,unconditioned environment. However,it should not be installed in direct sunlight or in the path of falling debris,such as under a tree,unless protected by a shade or canopy.

What is solshare & how does it work?

In its Orlando deployment, SolShare eliminated the equivalent of 1800 pounds of CO_2 emissions and saved each building tenant \$242 in electricity per year. SolShare now runs on over 1500 apartments, with demand booming around the world. In short, Allume's SolShare:
