

What is Algeria's solar energy project?

Completed in 2016, the project is a prototype and part of the country's transition, aimed at preserving fossil fuel resources and reduce greenhouse gas emissions. Houari Mahi is the head of engineering of Sonelgaz Energies Renouvelables, he explains to Euronews Algeria's potential regarding solar energy.

How much solar power does Algeria have?

By the end of 2023, Algeria had 437 MW of solar generation capacity, according to the national Commission for Renewable Energies and Energy Efficiency (CEREFE). The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south.

Is southern Algeria a good location for solar energy?

Southern Algeria is located in the Sahara Desert, which receives abundant sunlight throughout the year, making it a prime location for solar energy generation. The region has a high potential for both utility-scale and off-grid solar projects.

Where are solar panels made in Algeria?

Alongside Zergoun, the manufacturer Lagua Solaire has 200 MW of annual capacity for solar panel production in Algeria. The production plant of Algerian telecommunications and renewable energy company Milltech has a facility in Mila, in the east of the country, with a production capacity of 100 MW for M3-based modules. Manufacturing hub

Can Algeria achieve 15,000 MWp of solar energy by 2035?

To diversify its energy mix, largely dominated by gas and oil, Algeria wants to achieve 15,000 MWp of solar energy by 2035. A call for tenders is underway to install solar power plants in several regions. The region of Laghouat is at the forefront of this conversion: solar kits have been distributed to remote villages and to nomadic populations.

Is Algeria ready for solar energy?

Houari Mahi is the head of engineering of Sonelgaz Energies Renouvelables, he explains to Euronews Algeria's potential regarding solar energy. "Algeria has 3,000 hours of sunshine per year, and in the case of Laghouat, it is estimated at 1,800 hours per year. This is enough to push us to invest in the construction of photovoltaic structures."

To diversify its energy mix, largely dominated by gas and oil, Algeria wants to achieve 15,000 MWp of solar energy by 2035. A call for tenders is underway to install solar power plants in several...

Möchten Sie Sonnenenergie speichern, aber wissen nicht genau, wo Sie ansetzen sollten, klicken Sie hier.

wir Sie gerne von A bis Z zu diesem Thema auf. Ob es sich nur um ein kleines Ferienhaus, ein ...

Abstract: Algeria, strategically located at the northern gateway of Africa, boasts a significant renewable energy potential, with solar Energy in the Saharan region being a central ...

Durch den technischen Fortschritt ist es möglich, dass wir Sonnenenergie speichern können. Eine Speicherung der Sonnenenergie ist zudem durchaus wichtig: An Tagen, an denen keine ...

Mit einem Stromspeicher für Ihre Solaranlage lösen Sie dieses Problem: So erzeugen, speichern und nutzen Sie Ihren Strom effizient und zu Preisen, die deutlich unter den allgemeinen ...

L'Algérie, avec sa vaste étendue géographique et son climat ensoleillé, possède l'un des potentiels solaires les plus élevés au monde. L'ensoleillement moyen quotidien en ...
